

***Amendments to the Specification:***

Please insert the following paragraph on page 1 after the title and before the section entitled "Background of the Invention:"

This application is a 35 U.S.C. § 371 of International Application No. PCT/GB2004/003283, filed on July 30, 2004, which claims priority to GB20030017951, filed on July 31, 2003.

Please replace the paragraph on page 1 beginning on line 21 with the following paragraph:

Various adenosine A3 receptor agonists and uses therefor are ~~taught~~ discussed in the ~~prior~~ art.

Please replace the paragraph on page 3 beginning on line 5 with the following paragraph:

The above publications are all included incorporated herein by reference. The art therefore includes adenosine receptor agonists which are adenosine analogues characterised by specific variations which make the compounds capable of binding to and acting on one or more adenosine receptors. More particularly, the skilled person knows that there exists a class of adenosine analogue-type A3 receptor agonists.

Please replace the paragraph on page 29 beginning on line 13 with the following paragraph:

Further applications of the products of the invention are described in the prior art documents mentioned under the heading "Background of the Invention".

Please replace the paragraph on page 32 beginning on line 31 with the following paragraph:

The compounds of the invention have the advantage that they may be more efficacious, be less toxic, be longer acting, have a broader range of activity, be more potent, produce fewer side effects, be more easily absorbed than, or that they may have other useful pharmacological properties over, compounds known in the prior art.
